

To whom it may concern The primary reason my wife and I subscribe to XM satellite radio is to have absolute listening freedom that has never been available with conventional fm and am radio. Xm is continually adding new programing that was otherwise unavailable including instant traffic and weather. I look forward to this being available for the las vegas NV area. The music, news, weather and entertainment provided by xm satellite radio is here by demand of the free people of the united states. You must reject NAB's 04-106 and any future petitions to harm satellite radio.

Thank You
Rob Byers
